

Archiving & Reprocessing of Altimetry Data

to validated products

A reliable infrastructure for storage, traceability and product consistency

Automated Archiving Chain

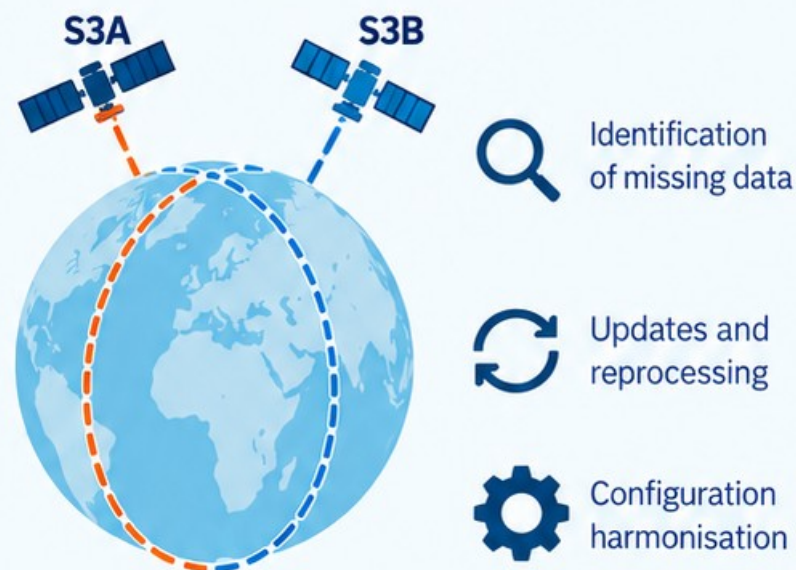

Secure, scalable and traceable storage

- Incremental detection of new files
- Transfer to S3 / Scality storage
- Integrity verification (file size, SHA256)
- Local check before deletion
- Support for different data types and layouts

Sentinel-3A / Sentinel-3B

Data completeness and production consistency

- Monitoring of data production (S3A / S3B)
- Detection of missing or inconsistent data
- Reprocessing and late updates
- Operational monitoring and configuration alignment
